

Research study seeking children to participate!

- University of Pittsburgh study under Andrea Goldschmidt, Ph.D., examining thoughts and eating behaviors in children
- Participants must be 9-12 years old, English-speaking, and available for follow-up for 2 years

What's involved?

- One clinic visit to determine eligibility; complete questionnaires, tasks to assess thinking skills, and an interview
- Two potential fMRI scans
- Follow-up visits at 4 timepoints over a two-year time period
- Participants will be compensated for their time!
