

Is your child interested in participating in sleep and eating research?

- If so, (s)he might be eligible for a study with University of Pittsburgh examining thoughts, sleep, & eating behaviors in children!
- Participants must be 8-12 years old and have no major sleep or appetite-related conditions.

We are now offering virtual and COVID-safe study visits!

What is involved?

- **1** clinic visit to determine eligibility; complete questionnaires and games
- **2** sixty-minute MRI scans
- **3**-week assessment period in which participants will receive games/questionnaires through text, & complete phone-based dietary assessments
- Participants will be compensated for their time
