

***Are you the mother of a teen girl aged
13-15?***

***Have you experienced depression at any time during
your daughter's lifetime?***

If so, you and your daughter may be eligible to participate in a research study to help learn more about how girls pay attention to emotional information and how this is related to their risk for developing emotional disorders.

Participation involves:

- **3 - 4 visits to our lab over 12 months**
- **Wearing a cap that measures brain waves (EEG)**
- **Computer tasks, questionnaires, and interviews**

Compensation will be provided.

This research study does not involve any medications or treatments
